River Walkway in Helper

Description: Helper has a wonderful paved walkway stretching for a mile or so along the Price River. This walkway winds through the riparian habitat between the Highway 6 and Helper. The trees block some of the road noise enabling singing birds to be heard.

Location: Access is by turning east off Highway 6 onto Helper Main Street (State Highway 157) and bend immediately to the south. After two blocks, angle west (right) onto

First Street where parking for 6 cars can be found. Restrooms are about a block south. The paved walkway extends both north and south from the parking lot.

Sightings: Site visited March 18, 2000 at 4:00 pm. We saw Cassin's Finch, Dark-eyed Junco, Song Sparrow, Lincoln Sparrow, American Robin, American Dipper and House Sparrow. (*description by Robin Tuck*)

Scofield Reservoir

Directions: 1. West approach: Take US 6 going up Spanish Fork Canyon. Go 23 miles past the Thistle junction, and turn right on UT 96 heading west then south about 16 miles to the reservoir.

2. East approach: Go about 14 miles northwest of Helper on US 6 and turn left on UT 96 heading west then south about 16 miles to the reservoir.
