

Rusty Blackbird

Date: 23 Dec. 1976.

Location: near Kanab, Kane Co., UT.

Description: same size & shape as Brewer's blackbird. Head, upper back, and breast were light brown with a distinctly scaly appearance. Remainder ^{of plumage} was darker brown to black, the tail and wings being darkest. Eye was yellow.

Voice: not heard

Behavior: Bird was sitting in a tree in a mixed flock of Brewer's, Red-wings, & starlings. Tree was in a field south of Kanab near some livestock corrals where the birds were feeding.

Observer: Steve Hedges
