Description of bird. Size, Colors, all field marks OBSERVED - Unique features of this bird, if any

Length of bird was about 4 inches; wing spread about 7 inches. Wings were long, narrow, and pointed. Tail was very short and slightly rounded. Plumage was grayish throughout except for throat and upper breast which was very light gray. Bill was very short, almost nonexistent.

ATTACH ADDITIONAL NOTES, LISTS OF REFERENCES, SKETCHES FROM LIFE, PHOTOGRAPHS ETC.

Field marks which were not seen. Why not?

None

Variations from expected field marks. .

None

List similar species and describe why or how you eliminated them.

Only similar shaped swift is Chimney Swift which is much darker on throat, nearly uniform gray.

Behavior of this bird. Include names of other birds with this one and any interaction.

Bird was flying low in a large circle over a stand of pinyon-juniper. Flight was fast with shallow, r. wingbeats. Wingbeats appeared to alternate.

Habitat this location and near by or adjacent habitat if significant.

Pinyon-juniper stand near residential area.

Describe birds song or sounds.

Not heard.

Names of other observers. A/C+phone

None

What is your experience with this or similar birds?

Very familiar with this + Chimney Swift.
