

8-1999

May 7, 1999

Dear Ms Sorensen,

On April 23, 1999 I photographed the Yellow-footed Gull at Wahweap, Glen Canyon National Recreation Area, AZ. Since this bird was also observed by the original observers at Lone Rock on Lake Powell in Utah, I thought to send you one of the photographs for the UOS Records Committee.

This bird was originally found by Chuck LaRue, John Spence, and two others. Gary Roseberg and I saw it several days later on the 23rd. As far as I know, it has not been relocated since then.

Sincerely,

Mark M Stevenson
