Procedures for Count: Select a circular area on the ground (may include water area), 15 feet in diameter, to include feeders, bird baths, shrubs, etc., as you wish. Imagine the circle extending upward as a cylinder. Count the numbers of individual birds of each species which come into this circle (or cylinder) during exactly ONE HOUR. Try to judge as best you can the actual number of individuals which are making visits to the Circle, or which fly through the imaginary cylinder. Try NOT to count the same individual bird over and over again. Please print clearly the number for each species in the In Circle column. If you wish to report any, seen outside the Circle, list them in the "Outside" column.
Pick any ONE-HOUR period during the day --and make the count on Thanksgiving Day! Please send your count results (even if you see no birds at all) to:
