The abundance and occurrence codes pertain only to birds found within the boundaries of Lytle Ranch, not to Beaver Dam Wash in its entirety nor to the surrounding ranches. The majority of the codes are based on monthly visits I made to the ranch from 1974 to 1999. Additional information from visitors that would update the codes for various species is welcomed. Please send information to Merrill Webb, Provo High School, Provo, Utah 84604.
